

REMARKS

Claims 1-30, 32, and 33 are currently pending in this application and are subject to a restriction requirement. The Examiner indicated that this application contained claims directed to a combination and a subcombination: Group I for a method of controlling a vehicle comprising detecting a potential wheel lift and generating a roll control pressure request, classified in class 701, subclass 72 and corresponding to claims 1-10; and Group II for a method of determining a wheel lift status, classified in class 701, subclass 70 and corresponding to claims 11-33. The Examiner thus required the Applicant to elect a single Group for prosecution on the merits.

Accordingly, the Applicant hereby elects Group II consisting of claims 11-33 for prosecution on the merits. It is therefore submitted that the Applicant has fully and completely responded to the restriction requirement.

It is respectfully submitted that all objections and rejections of record have been overcome and that all pending claims are now in condition for examination. A favorable action is therefore respectfully requested.

Please charge any fees required in the filing of this amendment to deposit account 06-1510 or, if insufficient funds in that account, use deposit account 06-1505.

Respectfully submitted,
